

# Adaptive Dance Classes

*Rae's Institute of Dance & Movement*

This class will provide students the opportunity to learn and explore different styles of dance and movement. Our focuses for the class include: enhancing student's confidence, team work, & listening/memory skills, all while building dance knowledge, rhythm, and stretching skills. However, our main goal is to have fun! We welcome students of all levels/experience. Our class is taught by Speech-Language Pathologist & Dance Instructor, Lauren Calcagnino. Additional teachers & volunteers will be there to assist students when necessary and provide encouragement along the way. Twice a year there will be a small performance, where students can show off their new skills they have learned in class. Class size will be limited to allow for optimal success and necessary supervision.
